

THE FUTURE OF WORK IS NOW: FIRST RESULTS FROM THE CALIFORNIA WORK AND HEALTH SURVEY

Edward Yelin, PhD
University of California, San Francisco
October 25, 2023 | 9 - 10 AM HST | 12 - 1 PM PT

Register: calaborlab.ucsf.edu/webinars

About the Webinar:

The California Labor Laboratory has just completed data collection on a comprehensive survey of a large random sample of the State's working age population. This presentation will highlight results indicating the extent to which alternative and contingent work is prevalent in California and the impact on the well-being of its population.

Learning Objectives:

At the completion of this activity, the learner will be able to:

- Summarize the California Work and Health Survey and the extent to which emergent forms of employment, including alternative work arrangements and contingent forms of employment, have taken hold
- Discuss how marginalized groups are affected by changes in the nature of work, including racial and ethnic minorities, immigrants, persons with disabilities, and older workers
- Analyze the impact of emergent forms of employment on the welfare of California's working age population

Speaker:

Dr. Yelin, the Edward A Dickson Emeritus Professor at UCSF, is the Principal Investigator of the California Labor Laboratory, a NIOSH Center of Excellence in Total Worker Health. Dr. Yelin has been researching the impact of changes in employment for several decades, with a focus on marginalized groups.
